EDUCATION

The ICT University, Cameroon

Expected: May 2027

Bachelor of Engineering in Software Engineering (GPA: 3.17 / 4.0)

- Relevant Coursework: Introduction to Software Engineering, Java Programming, Data Structures and Algorithms (C++),
- Python Programming, Object Oriented Analysis, Design and Implementation.

WORK EXPERIENCE

Software Engineer

July 2024- Present

Cameroon, Yaoundé

- Architected a **SAAS**-based backend system using **Node.js** and **Express**, improving API performance by 35%.
- Reduced query response time by 25% by optimizing **MongoDB** databases and indexing frequently accessed data.
- Spearheaded the development of a **React-based** customer-facing dashboard, enhancing user engagement by 40%.
- Designed and implemented **CI/CD** pipelines using GitHub Actions, accelerating deployment cycles by 20%.

Full Stack Engineer

Match 2025 - Present

Remote

- Developed user-friendly interfaces using **Angular**, improving customer satisfaction scores by 18%.
- Implemented automated unit testing using Jest, increasing code coverage by 30% and reducing production bugs.
- Collaborated in Agile sprints with cross-functional teams to deliver features on time and improve workflows.

EXTRA CURRICULAR

Events Team

NGCODEX CLUB

Match 2024 - Present

- Attended and completed the Microsoft Learn Student Ambassador Workshop on **Git & GitHub**.
- Contributed in building a website at NGcodeX at ICT University, Cameroon.

PERSONAL PROJECTS

Project Management System - Protrack

Technologies: React.js, Next.js, PostgreSQL

- Designed a Project Management platform, users can set goals, achieving 50% of project organization.
- Built a secure authentication system using **JWT**, enhancing data privacy.
- Reduced manual project management by 20% with optimized backend, fast data response enhancing user experience.

Employee Management System

Technologies: Java, Angular, Docker, Spring Boot

- Build an Employee Management System where employers/HR manages and assign tasks to employees, facilitating employers/HR work and management by 40%.
- Built scalable backend with **Java, Spring Boot** with Secure Authentication using JWT, Cookie, improving user security by 30%

AI-Powered Resume Analyzer

Technologies: React, React Router, Puter.js

- Built an **AI** resume analyzer, candidate upload their resume and AI automatically evaluate and match job requirement improving resume by 25%.
- Designed a Modern user interface to ease user visualization and enhancing their utilization with the app.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, TypeScript

Frameworks and Tools: React.js, Next.js, Angular, Node.js, Spring Boot, Docker, PostgreSQL, AWS, GitHub Actions

Concepts: Microservices Architecture, RESTful APIs, CI/CD, AI, Agile Development
